If you object to us using your child's information where we are relying on legitimate interests as explained above, please speak to the Headmaster.

Legal Obligation

The School may need to use your child's information in order to comply with a legal obligation, i.e. to report a concern about their wellbeing to Children's Services. ANNEX A – BIOMETRIC INFORMATION AND HOW IT WILL BE USED

We take site security very seriously and, throughout the school, doors to buildings are accessible via a biometric digital thumbprint system. The system we use is provided by Almas Industries (www.almas-industries.com).

Pupils are able to use the system from Form 2 upwards.

In addition, Kindergarten/Nursery parents may also have an image of their thumbprint taken to enable time limited access via the Manor Rd entrance for lunchtime collection of their child from Kindergarten/Nursery. The thumbprint image will be erased once the child moves out of Kindergarten/Nursery.

The school uses an automated biometric recognition system using biometric information from your child's thumbprint to enable your child to access areas around the School. The information the system uses is referred to as 'biometric information' and is encrypted partial data consisting of partial data from an image, which is encrypted and cannot be used to recreate the complete original image. This is the most secure type of biometric data.

This system will take measurements of your child's thumbprint and convert these measurements into a biometric template to be stored on the system in a binary format as Y axis and X axis reference points and the data is encrypted within the database. An image of your child's thumbprint is not stored. The template is what will be used to allow your child to access entrances around the School.

You should note that the law places specific requirements on schools and colleges when using personal information, such as biometric information, about pupils for the purposes of an automated biometric recognition system. For example, the school cannot use the information for any purpose other than those for which it was originally obtained and made known to the parent(s), the school must ensure that the information is stored securely, the school must tell you what it intends to do with the information, and, unless the law allows it, the school cannot disclose personal information to another person/body. You should also note that the only body that the school shares the information with is Almas Industries, the supplier of the biometric system, in order to ensure operation of the system.

In order to be able to use your child's biometric information, the written consent of at least one parent is required. Your consent is requested on the **Pupil Information Form** which needs to be completed when your child joins the School.

You or your child can object to the processing of your child's biometric information at a later stage or withdraw any consent you have previously given by putting your request in writing to the Headmaster. If you do not wish your child's biometric information to be processed by the school, or your child objects to such processing, the law says that we must provide reasonable alternative arrangements for children who are not going to use the automated thumbprint system.

Please note that when your child leaves the school, or if for some other reason he/she ceases to use the biometric thumbprint system, his/her biometric data will be securely deleted.
